EE382M: VLSI I
Monolithic 3D IC Basic Cell Library

Emily Bragg, Tengchieh Huang

emily.bragg@utexas.edu, toFillIn@utexas.edu

December 7, 2014

1 Introduction

2 Technology Background

2.1 3D ICs

2.2 Monolithic 3D ICs

3 Specifications

3.1 Overview

3.2 Interface

3.3 Design Targets

4 Design

4.1 Basic Architecture

4.2 Toolset

4.3 Optimization Techniques

4.4 Naming Conventions

4.5 Issue Tracking

5 User Document

6 Testing

7 Optimization

7.1 Optimizing Individual Cells

7.2 Using Monolithic 3D ICs to Optimize Full Designs

A   References

B   Source Code

C   Cell Layouts

Figure 1: Breakdown of code compilation versus execution.
